Action Information		
<div> <div>Description:</div> <div> <p>The above referenced report was received thru the National Response Center at approximately 3:45 p.m. this date. Exemption 6 reported a crude oil tanker accident today (8:00 a.m. CST) @ Mile Post 39 on U.S. Highway 23. The release of crude oil was estimated at 140 bbls. and was reported to affect land and ice. The North Dakota Emergency Management Service (701-220-0390 – Geneva Anderson) indicated that a pick-up attempted to pass several cars in a double yellow line section of the highway and collided with the crude oil tanker. Unfortunately, the pick-up driver was killed. For a distance of ½ mile, crude oil covered parts of the highway and adjacent ditches. The highway was closed immediately until 5:00 p.m. Strata Environmental has been hired for remediation. Frigid temperatures have worked in favor of the cleanup as penetration of oil is restricted to the top couple of inches in adjacent ditches. The cleanup contractor estimates an additional two days will be required to remove contaminated ditch soils. There was not a release of oil to navigable water of the United States.</p> <p>The State of North Dakota, via Emergency Management Services, is not requesting assistance and believe the situation is under control as the release is secured with cleanup activities well under way.</p> </div> </div>
